

## Reinforcing Mesh Corner

**Reinforcing Mesh Corner** for base coat reinforcement at building openings in application of the thermal insulation system - ETICS

### Material:

- Glass fibre mesh Vertex R131 complying with ETAG 004

### Features:

- Ideal corner reinforcement without mesh cutting on site
- Prevents cracks in critical points
- Considerable reinforcing process time saving

### Instruction for use:

Apply base coat mortar on the thermal insulation boards. Insert and press in the Reinforcing Mesh Corner. Remove and level the excess plaster outside the mesh with a trowel. Then install the beads and the main reinforcement.

### Packaging, storage and transport:

Packed in paper boxes. Store in a dry roofed place.

### Certifications and marks:

The product is not subject to any harmonized standard.

### Technical data:

|                           |                 |
|---------------------------|-----------------|
| Dimensions A x B x C [mm] | 350 x 300 x 200 |
|---------------------------|-----------------|
